

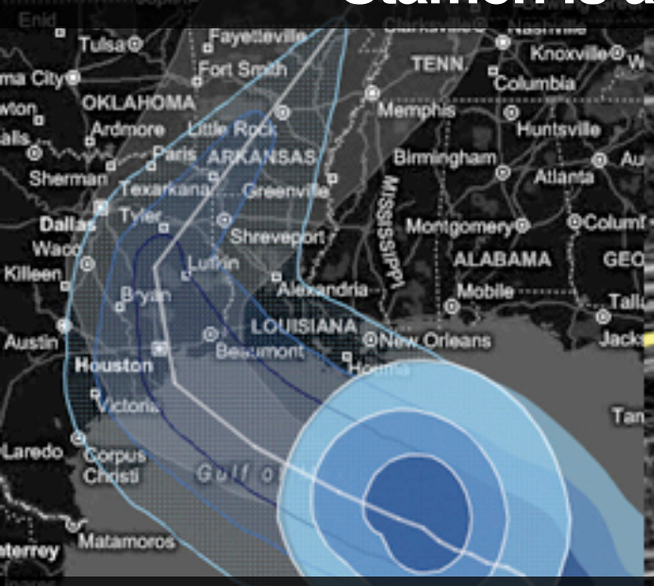
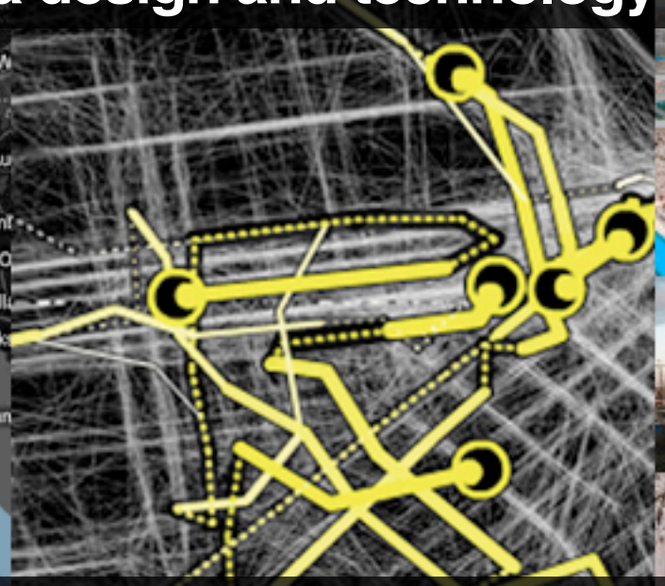
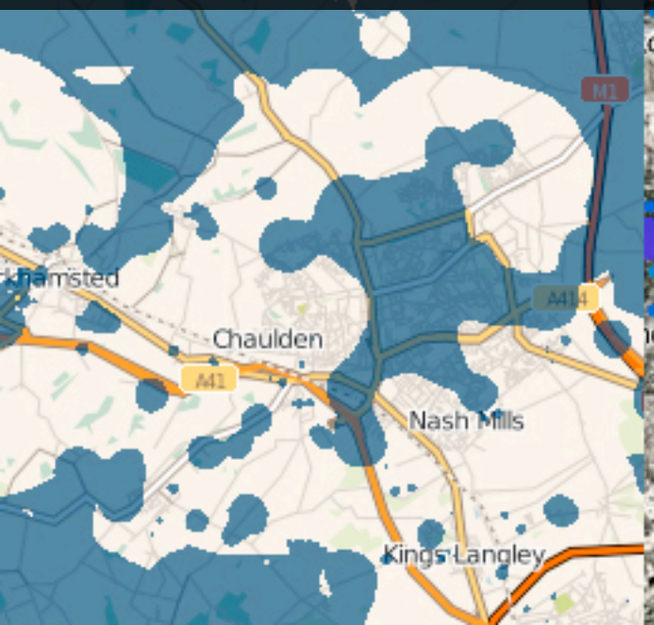
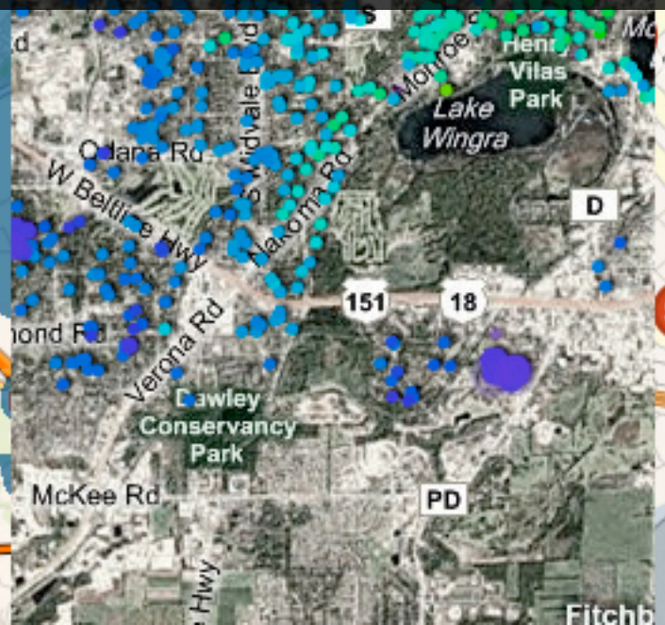
Stamen is a design and technology studio in San Francisco, California

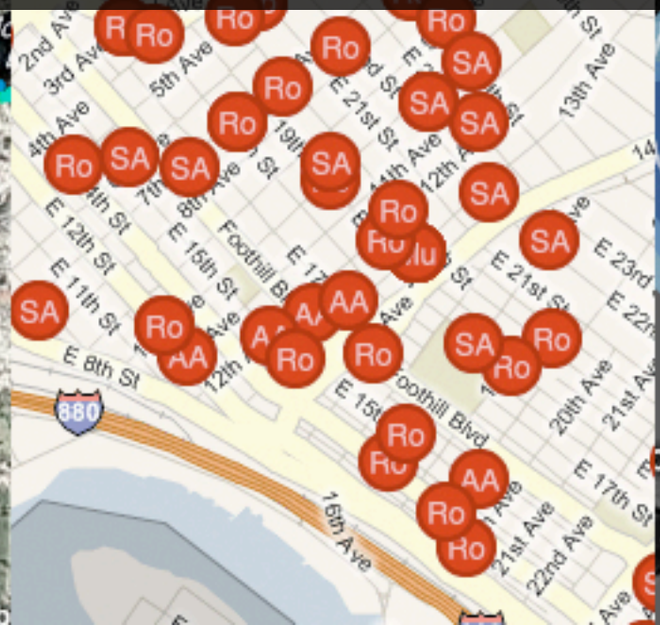




We design and build live, dynamic mappings of rich information datasets

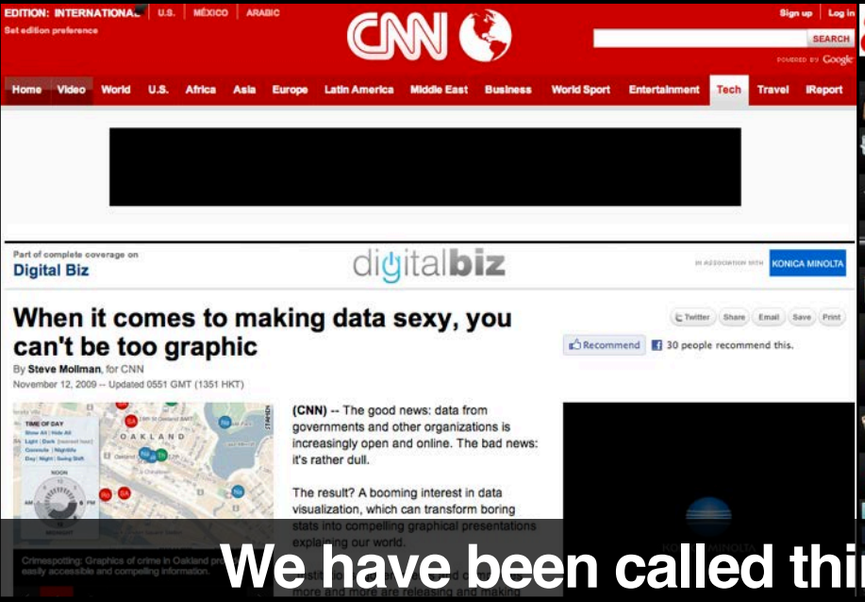


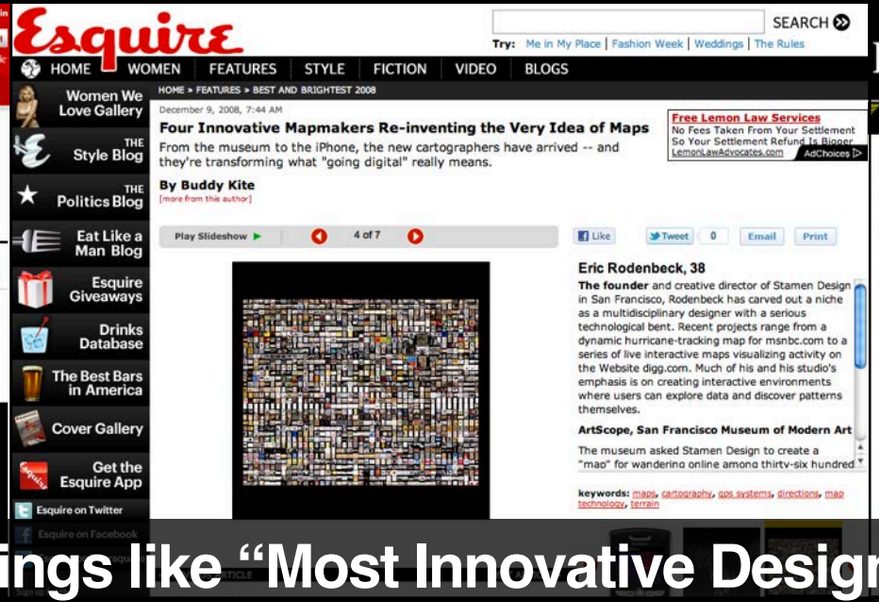


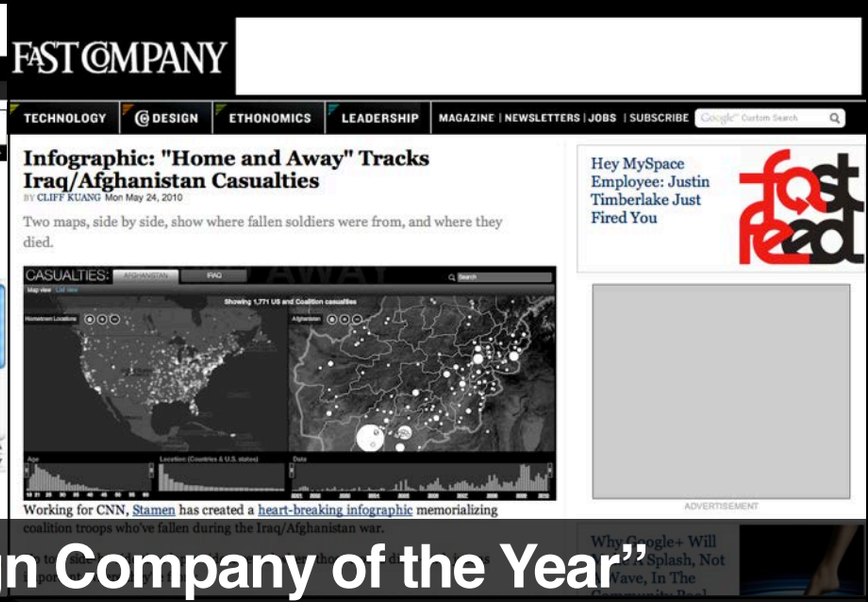


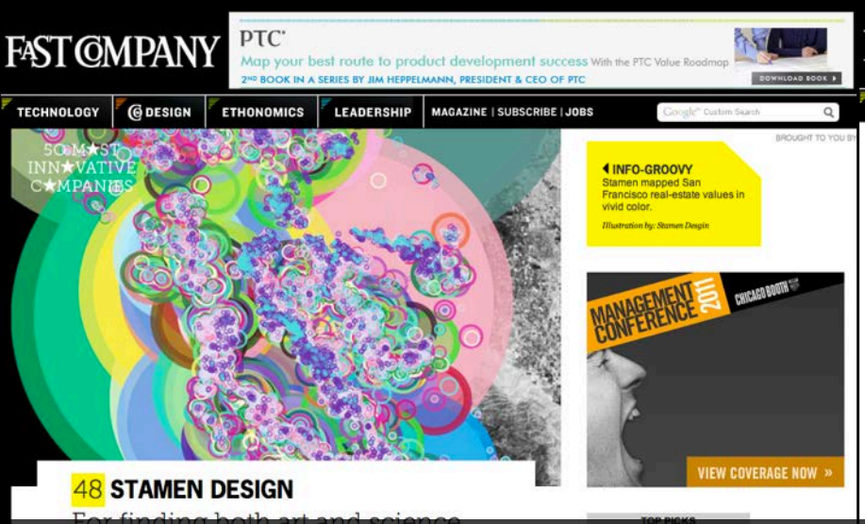
We have been called things like “Most Innovative Design Company of the Year”

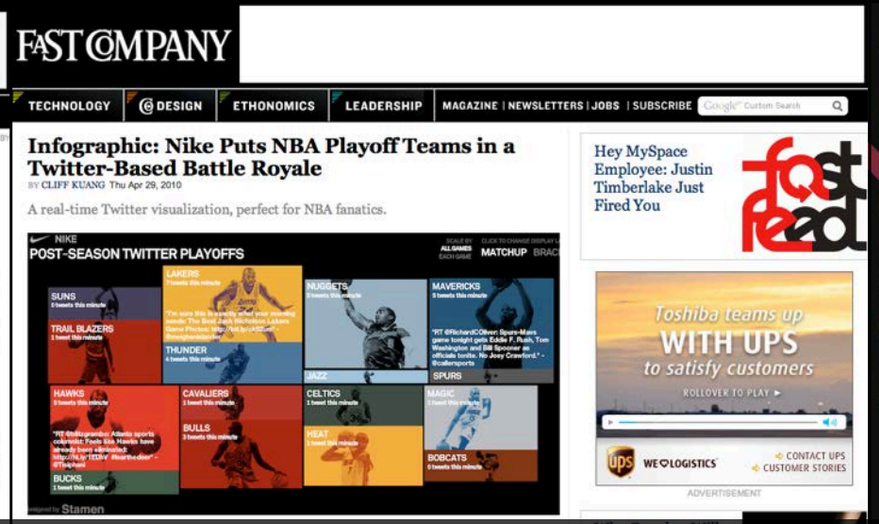
and are on lists of “Best and Brightest Companies”

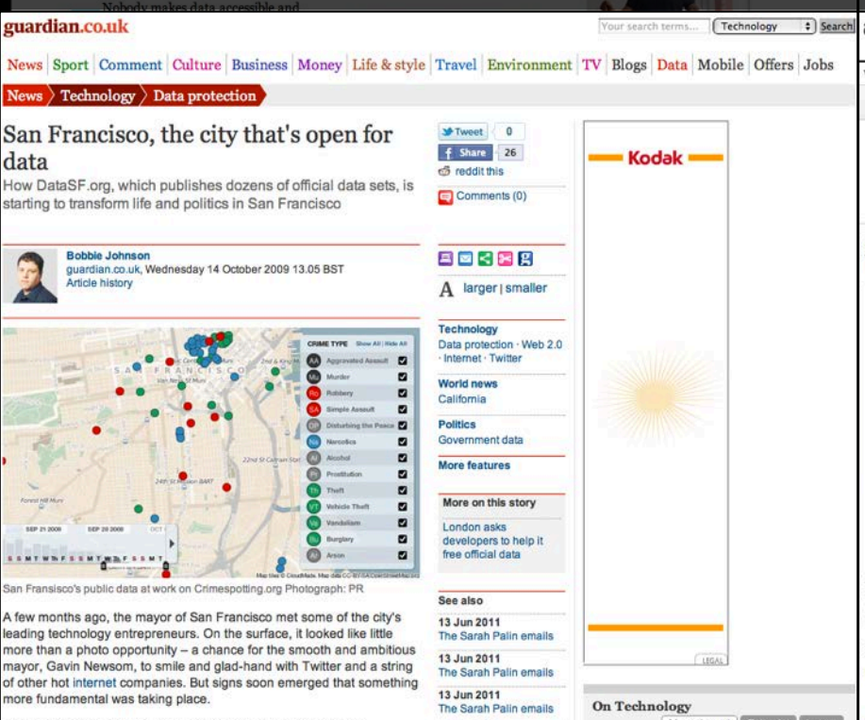


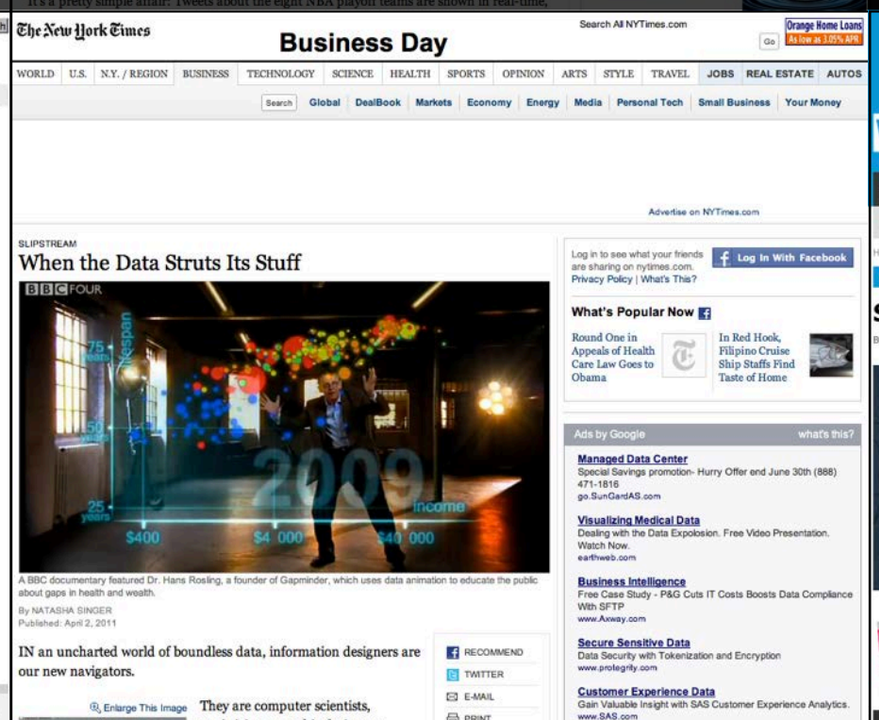












We've participated in shows at the Museum of Modern Art and the Art Institute of Chicago

{modest maps}

We actively contribute to the development of open source software

Polymaps

Walking Papers

Studio members often speak in public at events like TEDx and Where 2.0

Natural Earth

Free vector and raster map data at
1:10m, 1:50m, and 1:110m scales

Search

Home | Features | Downloads | Blog | Forums | Corrections | About

Natural Earth is a public domain map dataset available at 1:10m, 1:50m, and 1:110 million scales. Featuring tightly integrated vector and raster data, with Natural Earth you can make a variety of visually pleasing, well-crafted maps with cartography or GIS software.

Natural Earth was built through a collaboration of many volunteers and is supported by NACIS (North American Cartographic Information Society), and is free for use in any type of project (see our Terms of Use page for more information).

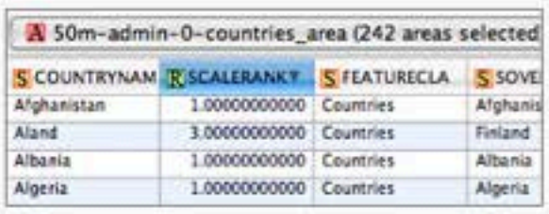
Get the Data

Convenience

Natural Earth solves a problem: finding suitable data for making small-scale maps. In a time when the web is awash in geospatial data, cartographers are forced to waste time sifting through confusing tangles of poorly attributed data to make clean, legible maps. Because

Neatness Counts

The carefully generalized linework maintains consistent, recognizable geographic shapes at 1:10m, 1:50m, and 1:110m scales. Natural Earth was built from the ground up so you will find that all data layers align precisely with one another. For example, where rivers and country



COUNTRYNAM	SCALERANK	FEATURECLA	SOVE
Afghanistan	1.00000000000	Countries	Afghanis
Aland	3.00000000000	Countries	Finland
Albania	1.00000000000	Countries	Albania
Algeria	1.00000000000	Countries	Algeria

GIS Attributes

Natural Earth, however, is more than just a collection of pretty lines. The data attributes are equally important for mapmaking. Most data contain embedded feature names, which are ranked by relative importance. Other attributes facilitate faster map production.

kelso.it/x/z4

7 billion people

How many cities is that?

How about 10,000 people per city?
700,000 cities should do, except ...

- We like living next to other people in some really big cities
- 1/2 the world still lives in tiny rural settlements
- Humans are zany!

http://kelso.it/x/x8
http://kelso.it/x/14

3.5 billion in just 7,500 cities = 50%

¿ 6.5 billion in 700,000 cities = 92% ?

7.0 billion in 2,300,000 cities = 99%

200 mega regions

12,000 metro-micros?

35,000 rural centers?

100,000 neighborhoods?

375,000 suburbs, edge cities?

178,000 rural outposts?

US has 300 million people with ~50,000 places = 6,000 people on average

World has 7 billion with ~2.3 million places = 3,000 people on average

148.94 million sq km land area but we only use 15% of that = 1 name per 10 sq km

148.94 million sq km land area but we only use 1% for cities = 1 name per 1 sq km

Add + About Eric

Pins from Maps.stamen

Online maps lack the texture and tactility of the old-fashioned kind, so designers at Stamen developed these gorgeous digital watercolors

Denise Carl onto Very Short List Inspiration

Queen's Park Map in Watercolour

Peter Cen onto Design Collect

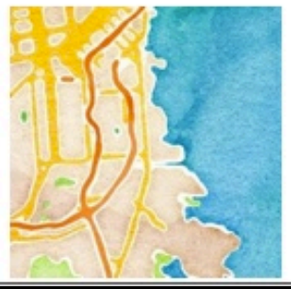
stamen's new black and white tiles - suits the designer in me... will be using these soon

the art of mapping online tool **maps.stamen.com/**

Gordana Batic onto Favorite Places & Spaces

Hot damn, Stamen makes beautiful maps.

Mike Dory onto Design



Beautiful watercolor map

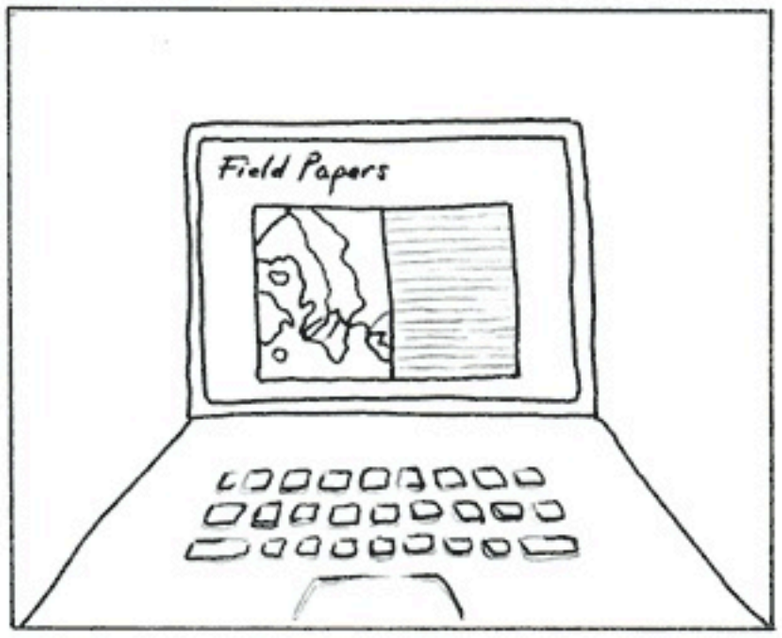
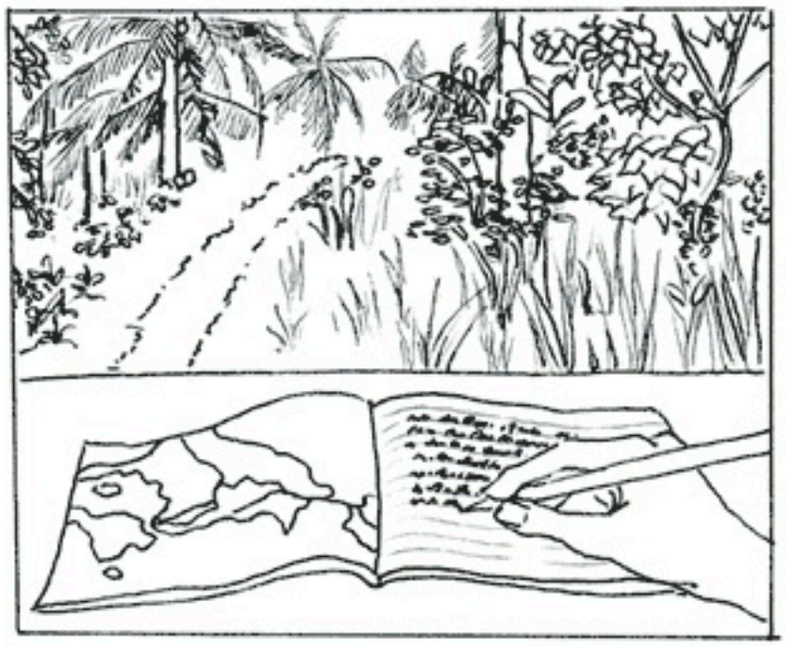
Welcome to Field Papers



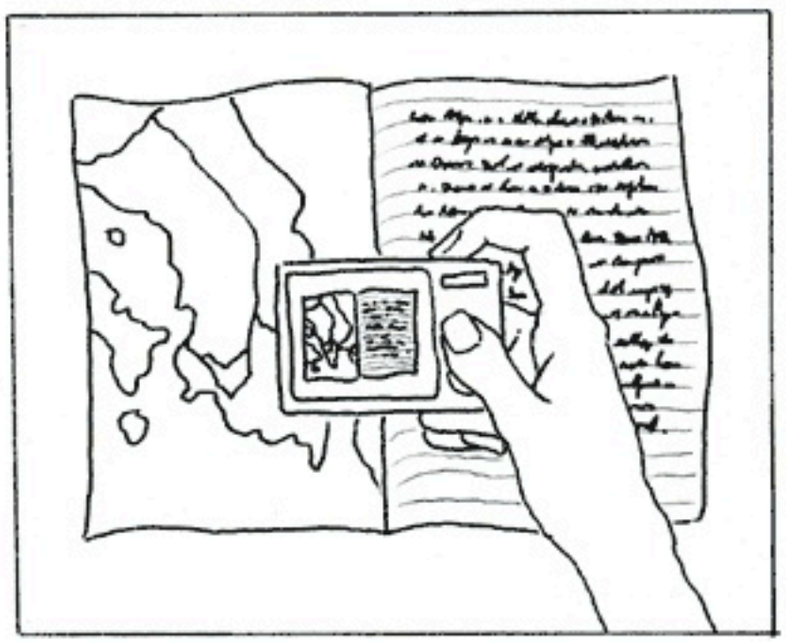
Make yourself an Atlas.

Print out anywhere in the world.



Take it into the field.

Scribble on it, draw things, make notes.



Take pictures of your notes.

Upload pages you've photographed.

Field Papers is built by Stamen Design.
Map data CC-BY-SA OpenStreetMap, Toner by Stamen, Bing by Microsoft, or a combination thereof.

Field Papers

i Add notes to page i of 36 from

Roll your own maps using data from:

- NaturalEarthData.com
- OpenStreetMap

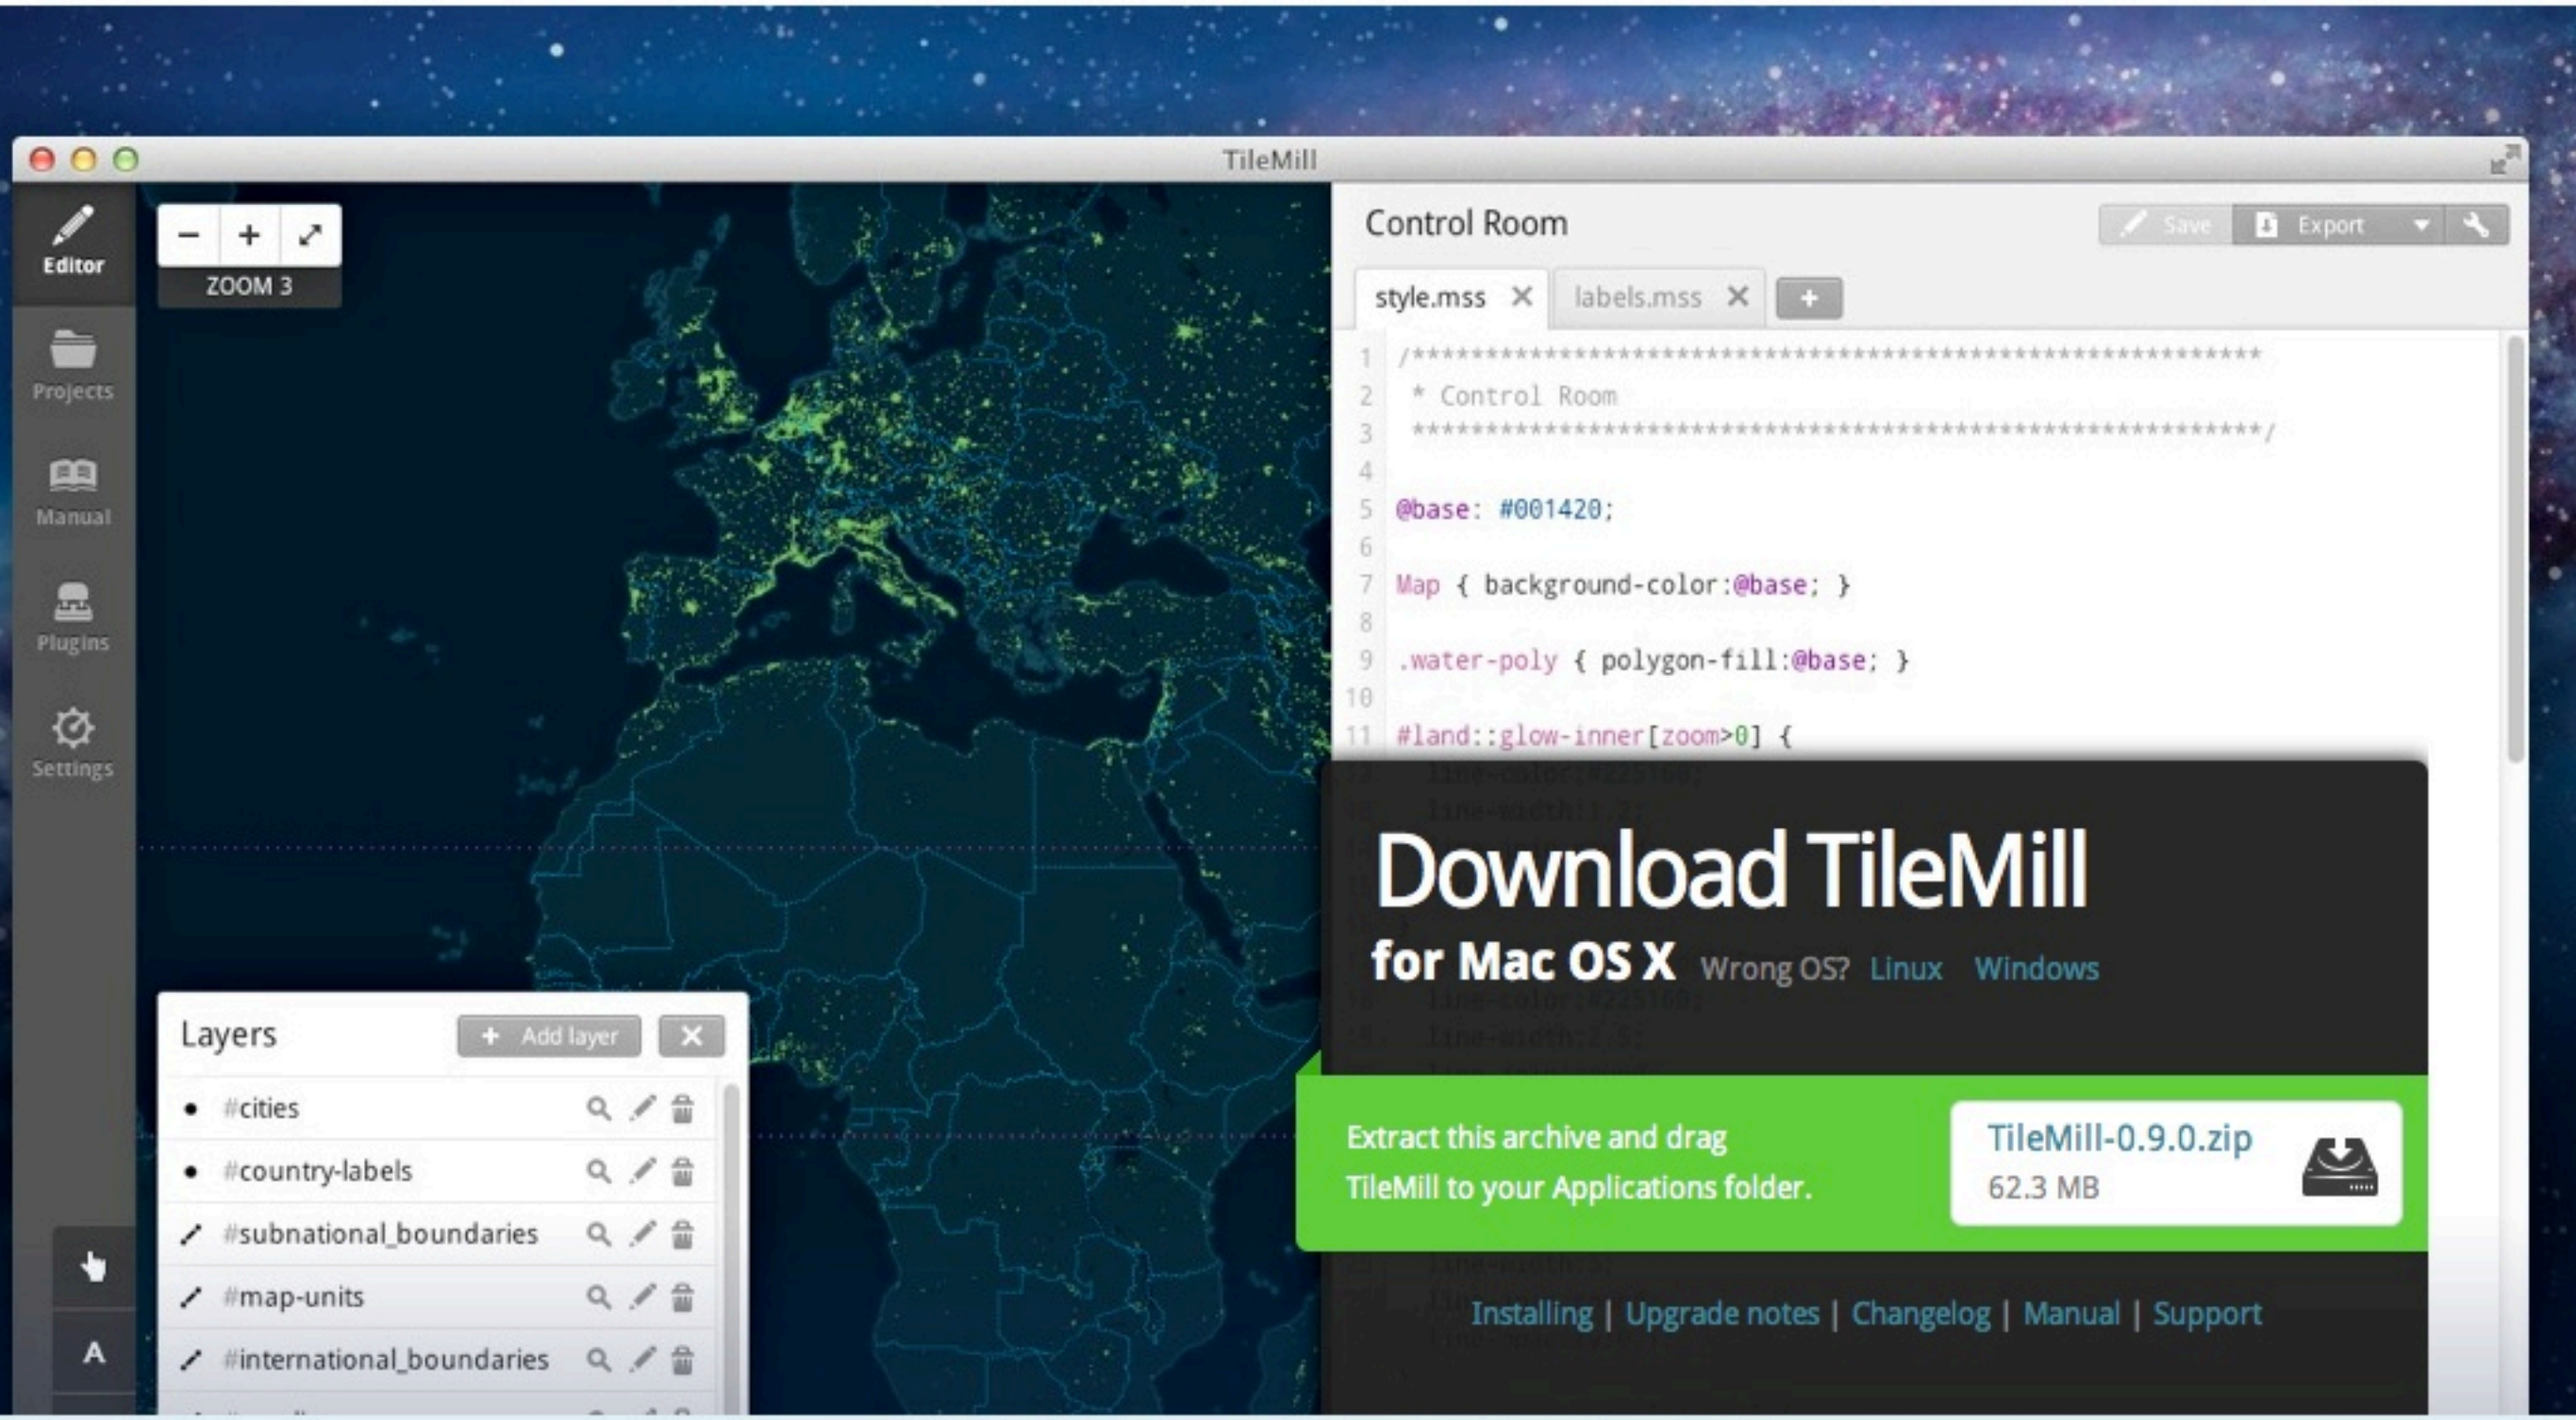
Prepare the maps in:

- QGIS, Mapnik, TileMill, etc
- Esri ArcGIS
- Adobe Illustrator
- D3.js
- Kartograph.js

Should your map be interactive?

- Web map API frameworks and viz kits

MapBox My account Tour Maps TileMill Help Plans + Pricing



TileMill is an application for making beautiful maps. Whether you're a journalist, web designer, researcher, or seasoned cartographer, TileMill is the design studio you need to create compelling, interactive maps.
